Web Design Services

PDS Web Design helps small businesses get their presence onto the web. We can provide website domain names and web site hosting packages to suit your needs and help with the setup and development of your site. We provide ongoing support to ensure that your site is up to date with your current business needs.

Web Site Hosting

PDS Web Design also provides all you need to get onto the web. We can organise your domain name and host your site on our servers then setup everything you need to get your website up and running as quickly as possible. There are numerous designs available if you want to design the website yourself using the Web Builder software packages.

Web Site Maintenance

Once your site is up and running we can help with the update of the site to ensure that your company information is fresh and up to date. We can also help with the site submission to ensure that your web site presence is targeted to the correct market place to ensure that customer traffic is directed to your site.
